

CONGRATULATIONS!

NEW HOME CONSTRUCTION PROGRAM Best of the Best

March 7, 2016

Dear Decker Homes,

Nearly 700 ENERGY STAR homes across the state of Michigan participated in the Consumers Energy New Construction program last year. All of these homes met rigorous ENERGY STAR construction standards.

But **only the top 5%** also achieved a Home Energy Rating System (HERS) Score better than 50. And homes by Decker Homes were among these.

In recognition of the home(s) listed below, Consumers Energy has issued a **Best of the Best** bonus and this letter of commendation. These homes had HERS Scores under 50, which ranks them in the **top 5%** of participating ENERGY STAR homes.

1875 W Rauch Rd	Home Energy Rating System (HERS) Score of	49
9975 Jackman Rd	Home Energy Rating System (HERS) Score of	36**
** Best Score of 2015		

These homes represent an outstanding accomplishment. Lower HERS scores represent greater energy savings, industry-leading building techniques, and higher comfort and quality for our shared customers.

The Consumers Energy New Construction program seeks to support and recognize Michigan home builders who use high-efficiency residential construction practices to provide greater home health, comfort and energy efficiency for our shared customers. Visit us at ConsumersNewHomeConstruction.com to find out more.

Thank you for your exemplary contribution to Michigan home construction.

Sincerely,

Consumers Energy New Home Construction Program
